Initial Interior & Exterior Service:

- Apply residual pesticide under siding, around cracks & crevices at doors, windows, or other outside penetrations.
- Establish a barrier with residual pesticide up to 3 feet up the walls of the foundation and up to 3 feet out from the foundation, and spot treat under rocks or flagstones.
- Place one or more exterior rodent monitoring stations by exterior air handler.
- Remove cobwebs from eaves and vacuum out door and window runways of debris.
- Install interior mouse monitoring stations in garage, under sink and in basement.
- With owner's permission, use residual pesticides or baits under sinks, pipe chases, etc.

Bi-Monthly Service:

- Check all Sentricon® and Sentricon® AG Stations.
- Re-apply barrier with residual pesticide on and around the foundation, and spot treat under rocks or flagstones.
- Check, clean and re-bait all rodent monitoring stations.
- Remove cobwebs from eaves and vacuum out door and window runways of debris.
- Check under sinks, pipe chases, etc., and apply pesticides or baits as needed with owners permission.
